THE JOURNEY TO A WORLD-FIRST:

A SUSTAINABLE LEGACY

“

At Kaolin, every creation is born from a philosophy that transcends the fleeting nature of trends. Our story is rooted in a prestigious lineage of manufacturing excellence—a legacy established in 1995 that has evolved into one of the world’s most respected producers of fine porcelain tiles. Driven by a collective of master’s in art and engineering, we have maintained our position among the global elite for over a decade.

But what sets us apart is not just our capability—it is our substance. We believe the most beautiful things in life aren’t just manufactured; they are born from a series of intentional choices. For us, those choices happen at the kitchen table as much as they do on the factory floor.

Founded by Rita and Anton Bourtsev Kaolin Surfaces is a synthesis of global expertise and a shared life in Sydney. Rita—influenced by the matriarchal values of her grandmother and the poetic depth of Chinese literature—met Anton, a technical visionary from Belgium, while studying in Europe. Together, they have cultivated a creative melting pot focused on an uncompromisingly sustainable product that heightens the senses.

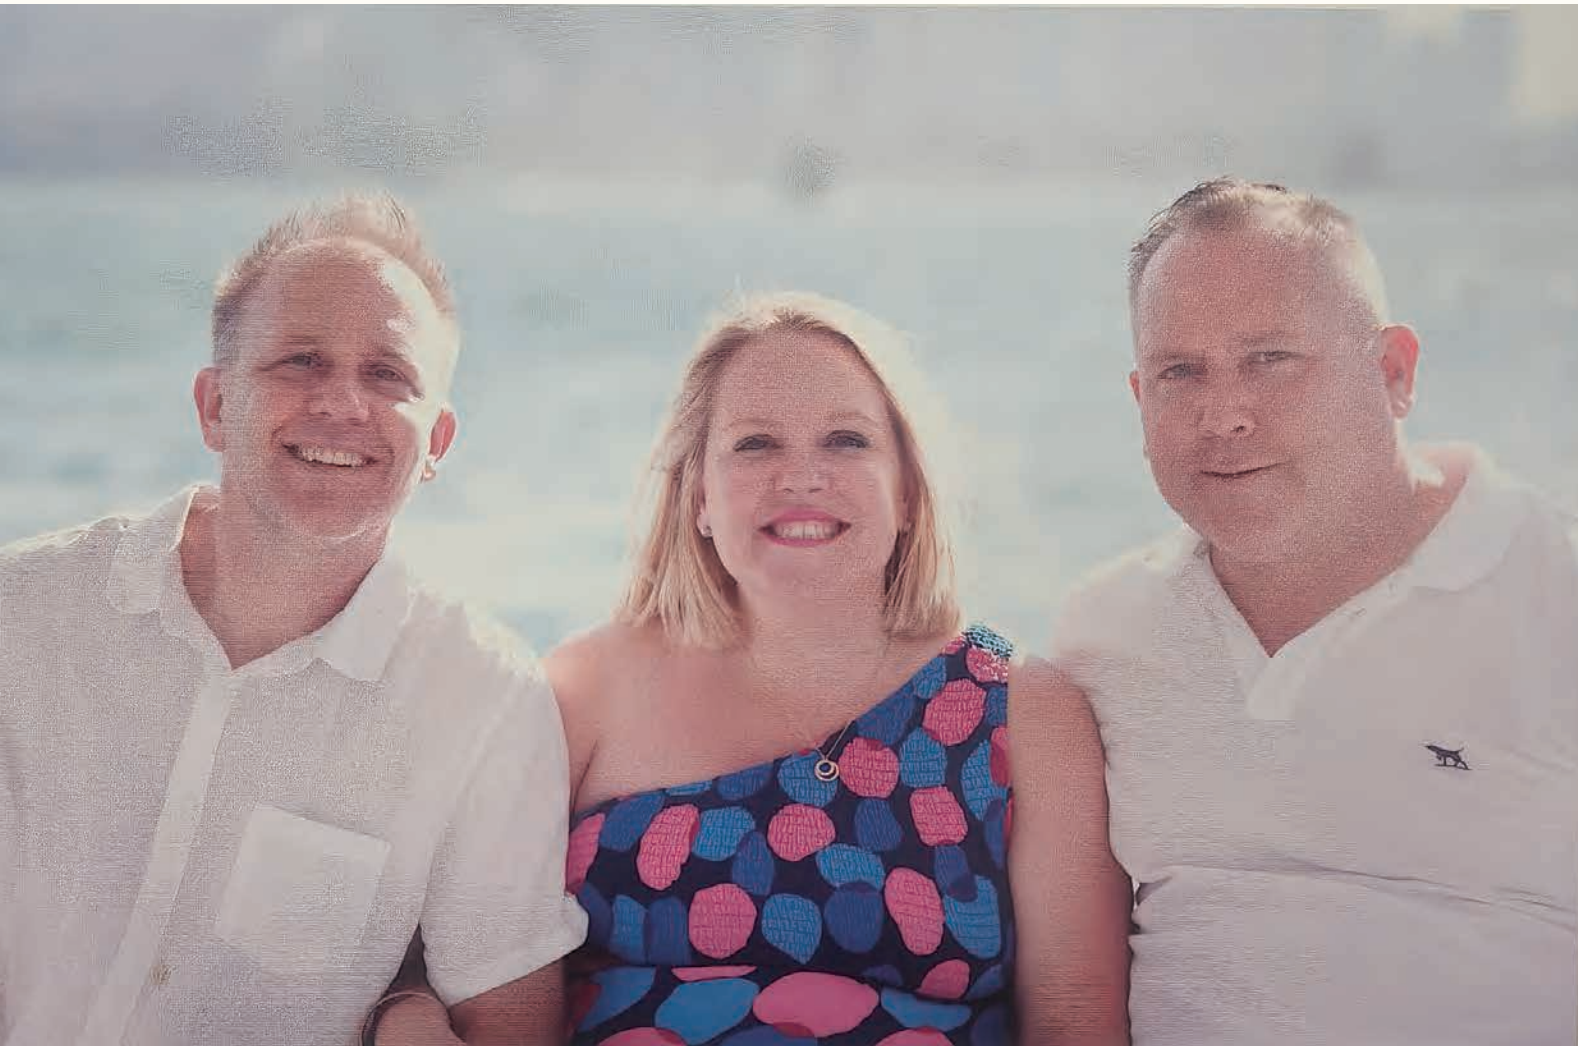

This commitment to integrity is reflected in our Global GreenTag Level A certification—recognised by the Green Building Council of Australia as the gold standard for sustainable and health-conscious building materials. Our advanced production campus, featuring state-of-the-art intelligent warehousing, serves as a benchmark for ethical manufacturing and environmental integrity. By listening to the evolving needs of visionary architects and designers, we realised that true luxury is defined by how something is made, why it is made, and the legacy it leaves behind. This is the heart of our latest chapter: a world-first, sustainable vanity collection driven by purpose and crafted for the enduring Australian home.

50 YEARS OF SUSTAINABLE AUSTRALIAN DESIGN

Rifco Story

FAMILY LEGACY

Founded in 1975 and proudly run by
the second generation in Sydney.

Rifco is proud to be an Australian second generation family run business, located in the heart of Sydney. Founded in 1975 by husband and wife team Alan and Janet Fletcher in a small factory in Marrickville making mirrors and shaving cabinets.

EXPANDING THE LEGACY

They ran the company for a fabulous 26 years before Alan's sudden passing in 2001 and the Rifco reins were handed over to their three children Luke, Samuel and Kate.

Building on their parents legacy, the Trio dared to expand the Rifco brand whilst ensuring their name became synonymous with quality Australian Made™ products. Market leaders in the industry for their creative designs that have influenced bathroom trends such as round mirror cabinets, timber vanities and curved vanities.

The dream continues today as they strive to create an environmentally sustainable company to one day pass down to their own children.

BUILDING A GREENER FUTURE

A company dedicated to using locally sourced material including sustainably sourced certified timber products, EO (zero emission) board, using reclaimed product packaging, optimised cutting on CNC's to ensure less waste, reducing our carbon footprint by recycling our cardboard, board and glass processing water. Solar panels are fitted to our factory roof allowing 90% of our electricity to be powered by clean energy and reducing greenhouse gas emissions.

With such a rich legacy Rifco is blessed to have had, we will continue to develop our reputation for quality, friendly service, sustainability and family values to have a company you will be proud to know.

- Proudly made in Australia
- Family focus family owned & run
- Friendly customer service we pride our selves on our customer service
- Custom design we can make what you dream!
- Since 1975, nearly 50 years of bathroom industry experience
- Sustainability

EDITOR'S WORD INTRODUCING NEST

JASON MIFSUD

NEST was born from a deep passion for design and a considered understanding of the Australian market – its landscape, its architecture, and its evolving design language.

The journey began with the translation of refined tonal palettes, inspired by Tubman's Paint, into hard surfaces – transforming colour from a decorative afterthought into a foundational design element. By injecting layered, architectural colour into materiality itself, NEST opens new dimensions for designers to work cohesively across surfaces, forms, and spaces.

From this vision emerged a powerful collaboration between market insight and manufacturing excellence. NEST represents the coming together of creative direction and technical mastery – allowing the Australian design community to create with cohesion, clarity, and confidence. Rather than contributing to a saturated marketplace, NEST offers a purposeful system: one that empowers unlimited design outcomes driven by intent, not trend.

With over 30 years of experience across design and business management, the foundation of NEST is built on detail, foresight, and strategic vision. It is positioned not simply as a new product release, but as a market leader – redefining expectations in both design integrity and manufacturing excellence within Australia.

Vision without execution falls short. NEST is supported by like-minded manufacturers who share an uncompromising commitment to quality and innovation. Five years of creative development and market refinement have culminated in a range that allows the industry to celebrate design in ways previously unexplored – while honouring the organic textures, tonal warmth, and relaxed sophistication intrinsic to Australian design.

The collaboration between Rifco and Kaolin throughout the development of NEST has been a defining highlight. Both companies share a unified ethos: excellence is not questioned – it is pursued. The conversation is never "no"; it is always "how can we?"

NEST celebrates Australian organic design through clean lines, softened curves, and sculptural forms that move in harmonious rhythm. Each piece is designed to ground a space, take centre stage, and flow effortlessly alongside its complementary elements. It is a system of considered components – connected, intentional, and refined.

This design model challenges how we view hard surfaces and integrated forms. It brings sustainable, high-end design to the forefront of the market – elevating not only aesthetics, but the way spaces are conceived.

NEST is more than a range.

It is a new rhythm for Australian design.

A CONVERGENCE OF STEWARDSHIP: Kaolin x Rifco

Together, Kaolin and Rifco bring over a century of combined expertise to this partnership. By marrying the technical mastery of porcelain with the warmth of Australian timber, we have set a new standard for conscious luxury, proving that the most beautiful homes are those built with a conscience.

“

The partnership between Kaolin and Rifco is a testament to the power of **design in Australia**, blending world-class technical innovation with a deep-rooted commitment to environmental stewardship. At the heart of this collaboration is a shared belief that a truly **sustainable product** should never compromise on luxury. By aligning our manufacturing philosophies, we have created a collection where **sustainability** is woven into every surface and joint.

KAOLIN: A CIRCULAR ECOSYSTEM

For Kaolin, environmental integrity is a global mission. Our production is a closed-loop system where **100% of water is treated and recycled**, and any porcelain that does not meet our exacting standards is reintegrated into the manufacturing cycle—ensuring zero waste to landfill. Beyond the factory floor, we act as guardians of the landscape, actively preserving **11,000 hectares of native forest** to protect biodiversity. With our **Global GreenTag Level A certification** and solar-powered facilities, we provide the Australian market with a **sustainable product** that is independently verified for its ethical and environmental excellence.

RIFCO: MADE IN AUSTRALIA

Since 1974, Rifco has been a benchmark for quality furniture **made in Australia**. Their approach is practical and artisan-led, utilizing only the finest **sustainably sourced Australian hardwoods**. By combining precision technology with hand-crafted finishes, Rifco ensures that every piece is built for longevity, countering the “fast furniture” culture with enduring quality. Their commitment to **sustainability** is reflected in their low-emission production, powered by solar energy and onsite water recycling. From the use of reclaimed packaging materials to their heritage of local manufacturing, Rifco represents the very best of Australian industry—creating beautiful timber pieces that respect the environment they came from.

"NEST celebrates Australian organic design through clean lines, softened curves, and sculptural forms that move in harmonious rhythm."

FORM COLLECTION

Form Collection

Pushes the boundaries of modern bathroom design.

SCULPTED UTILITY

A fully sustainable integrated porcelain vanity paired with Australian-made luxury cabinetry, bringing considered craftsmanship and sustainable innovation to the world stage.

ELEMENT

— ESSENTIAL, PURE, FOUNDATIONAL

ELEMENT

The Element range embodies the essence of refined design – stripped back to its most fundamental forms. Every line, plane, and proportion is considered with precision, creating a composition that feels deliberate and balanced.

Rooted in strength and structural clarity, the integrated porcelain top sets the tone, while the cabinetry mirrors its geometry in a softer, more delicate expression. This harmony between form and function reinforces the range's foundational quality, offering a design that is at once bold, elegant, and timeless.

Element celebrates purity in material, precision in execution, and strength in form – a versatile piece that anchors any interior while allowing other design elements to shine.

CORE

— STRUCTURAL HEART, SOLID BASE

CORE

The Core range embodies strength at its essence, serving as the structural heart of any interior. Its design is grounded in solid proportions and unwavering presence, delivering both stability and confidence in form.

The integrated porcelain top provides a commanding foundation, while the cabinetry echoes this strength through thoughtful detailing and precise geometry. Together, these elements create a cohesive composition that balances bold structure with subtle refinement.

Core celebrates durability, integrity, and purposeful design — a range that anchors spaces with strength and sophistication, offering both visual impact and timeless reliability.

LINEA

—

CLEAN LINES, DISCIPLINED GEOMETRY

LINEA

The Linea range is a celebration of precision and modern elegance, where every line and angle is carefully orchestrated to create a sense of order and sophistication. Its design draws strength from disciplined geometry, translating architectural principles into a functional, refined form.

The integrated porcelain top establishes a seamless, structured surface, while the cabinetry mirrors its linear language with subtle refinement. This interplay of bold geometry and delicate detailing creates visual harmony, delivering a range that feels both strong and graceful.

Linea embodies clarity of design, precision of execution, and timeless sophistication – a statement piece that brings architectural intent and understated elegance to any interior.

CLADDED VANITY

CLADDED

The cladded version offers a refined way to achieve the luxurious look of a vein-matched natural marble vanity. Each drawer front is meticulously aligned to create a continuous stone effect, allowing the movement of the surface to flow seamlessly across the piece.

The edges are carefully finished rather than exposed, with matching timber detailing that creates a refined transition between the porcelain surface and the vanity structure. This distinctive solution, developed by Kaolin and Rifco, combines the visual impact of marble with the precision, durability, and craftsmanship of a fully considered vanity system.

BEYOND THE DOUBLE VANITY

Breeze Modular

Considered pairings, thoughtfully curated to allow unlimited freedom — empowering the creation of bespoke designs through balanced, refined elements.

THE WISDOM OF CUSTOMIZATION

This approach eliminates the need for on-site measurement compromises that often result in oversized cabinetry, instead celebrating balance, proportion, and breathing room within the space. Every installation becomes a thoughtful, bespoke arrangement—elevating the sense of space and sophistication in any bathroom.

REDEFINING THE BATHROOM

The Breeze Modular range re imagines the traditional wall-to-wall vanity or couple's ensuite, inviting a new way of thinking about bathroom design. It allows each vanity component to stand independently, giving space for the slab vanity to take center stage and creating a composition that speaks uniquely to each client.

MINIMAL COLLECTION

ALLOWING THE CABINETRY TO COMMAND ATTENTION
SHIFTING THE CORE FOCUS
AND INJECTING NEW WAYS TO APPROACH DESIGN

Minimal is an exploration of restraint – a quiet confidence that speaks through form, materiality, and precision. This range embodies the essence of understated luxury, often referred to as quiet luxury, where beauty is not declared loudly, but revealed through detail, proportion, and craftsmanship.

At its core, Minimal shifts the focus back to the cabinet itself – rethinking what the market has come to expect. Unlike conventional ranges that compete for attention, Minimal invites a new way of thinking. It celebrates subtlety. It honours balance. It allows the architecture of the piece to breathe.

The sustainable integrated top becomes a moment of discovery. Upon the opening of each drawer or door, it quietly commands attention – creating a refined yet impactful experience. The interaction feels intentional, considered, and elevated. It is luxury that unfolds, rather than announces itself.

Whether expressed through clean geometric lines, harmonious curves, or the celebration of finely selected timber grains, Minimal adapts effortlessly to its environment. Every edge, every junction, every surface has been resolved with purpose.

“

The result is a collection that evokes emotion through simplicity – calm, composed, and confident. Minimal does not chase trends; it transcends them. It turns heads not through excess, but through purity of design and uncompromising detail.

MIRROR COLLECTION

SOLIS

AURA

SOLIS & AURA – FORMED TO COMPLEMENT

The Solis and Aura mirror range was conceived as a complementary extension to the collection, introducing softness and fluidity to balance the strength of the core forms. Where the cabinetry speaks in disciplined lines and defined geometry, Solis and Aura introduce gentle curves and sculptural silhouettes – creating moments of subtle contrast and visual relief.

Designed to bring warmth and harmony into the space, the range thoughtfully incorporates raw materials such as brass, celebrating their natural character and tactile quality. These refined metallic accents add depth and a sense of quiet luxury, softening the architectural structure of the overall collection.

The result is a mirror range that enhances rather than competes – delivering balance, material richness, and a layered design narrative that feels cohesive, elevated, and intentional.

DAWN

DUSK

DAWN & DUSK MIRROR COLLECTION

The Dawn and Dusk mirror collection has been thoughtfully designed with sustainability at its core, utilizing responsibly sourced natural timber as the hero material. This range celebrates the authenticity and character of real timber while pushing the boundaries of what is achievable in refined, contemporary design.

Defined by its soft, curved lines and sculptural silhouette, Dawn and Dusk introduce a gentle architectural flow to interiors. The subtle curvature enhances the organic nature of the timber, creating a harmonious balance between structure and softness. These rounded forms remove harsh edges, allowing the mirrors to feel inviting, calming, and effortlessly sophisticated.

By embracing the natural grain, tonal variation, and textural depth of timber, the collection brings warmth and understated luxury into bathrooms, bedrooms, and living spaces. The fine detailing and precision craftsmanship elevate the material beyond the expected, delivering a high-end aesthetic that feels both grounded and refined.

NOOK COLLECTION

SCULPTED UTILITY

Nook challenges the market's traditional perception that small spaces must be purely functional or dominated by obvious storage solutions. Instead, it redefines how we approach compact living in 2026 – proving that intelligent design can be both space-conscious and beautifully refined.

With its reduced depth, Nook responds directly to the way we are living today. Apartments are becoming more compact, powder rooms more curated, and secondary spaces more considered. Rather than compromising on design, Nook embraces these constraints as an opportunity. Its streamlined profile allows it to sit comfortably within tight floor plans, narrow ensuites, and layered commercial environments, without overwhelming the space.

What sets Nook apart is its ability to adapt. It seamlessly accommodates both large and small spaces – in smaller settings, it becomes a hero piece that maximises usability without visual heaviness; in larger spaces, it works as a subtle architectural layer, adding functionality while maintaining flow and proportion.

“

This range is driven by a core focus on additional furniture elements that thoughtfully solve current industry challenges. It rethinks how storage is integrated within bathroom spaces, introducing smarter, more refined solutions without compromising design. With the client experience at the forefront, every detail has been carefully considered—creating a design language that flows seamlessly across all future ranges, setting a new benchmark in functional, elevated bathroom design.

INSTALLATION & CARE INSTRUCTIONS

INSTALLER

Rifco products **MUST** be installed by a licensed tradesperson. Please check the product for any damaged **PRIOR** to commencing work. Installation of product constitutes acceptance of the product in its current condition, specifications, and finish.

HOME OWNER

Please read the important warranty, care & maintenance information inside and keep for future reference.

PLEASE READ BEFORE
INSTALLATION

PLEASE READ BEFORE INSTALLATION

☐ This product must be installed by a qualified tradesperson.

☐ Please inspect the product BEFORE installation for any damage, defects, errors with workmanship or specifications. PLEASE NOTE: No claims for damage or incorrect product will be accepted after 48 hours of delivery.

☐ Installation of this product constitutes acceptance of its colour, design, size and style.

☐ It is the responsibility of the installer to make required adjustments to the doors, drawers or drawer bases.

If for some reason this product is not in good order and condition, or does not meet your expectations, STOP INSTALLATION IMMEDIATELY and contact place of purchase or contact Rifco. Warranty claims will not be accepted after the product has been installed. Rifco is NOT ACCOUNTABLE for any costs incurred due to damaged products being rejected after installation.

Service Call Out Fee

Should there be an issue with your Rifco product that is covered under the Rifco Warranty Policy, no call out fee will be charged.

If a Rifco representative is called out for things not covered under warranty such as door or drawer alignment or the installer has not followed the installation instructions correctly, a service call out fee of \$300 (incl. GST) will be applied.

*Note: Response times will vary depending on technician availability.

PRE- INSTALLATION CHECKLIST

✓ Check Product for Damage

Inspect the product for damage or defects as well as for any errors with workmanship, colour, design, style, or design. Installation constitutes acceptance of the product including style size and quality. No claims will be accepted for damages after installation or 48 hours after delivery. If you notice any issues with your Rifco product, please contact place of purchase as soon as possible and DO NOT REMOVE any packaging or protectors on the product.

✓ Location & Ventilation

All vanities, shaving cabinets and mirrors are manufactured using water resistant materials. However, they are not waterproof. Do not allow exposure to shower spray and eliminate moisture build-up by ensuring your new Rifco product is installed in a well-ventilated area. Exposing your bathroom furniture to high humidity and moisture build up can lead to deterioration. Water damage is not covered by warranty.

✓ Structural Support

It's important to ensure that walls are plumb as a non-plumb wall will result in doors and drawers not aligning correctly. For wall hung products, support beams between studs are required to support the fixing of your vanity or shaving cabinet.

✓ Storage (Pre-Installation)

DO NOT place cabinets on hard ground. Ensure extra care is taken with cabinet corners as hard knocks can cause damage/cracking to the mirror.

Service Call Out Fee

Should there be an issue with your Rifco product that is covered under the Rifco Warranty Policy, no call out fee will be charged.

If a Rifco representative is called out for things not covered under warranty such as door or drawer alignment or the installer has not followed the installation instructions correctly, a service call out fee of \$300 (incl. GST) will be applied.

*Note: Response times will vary depending on technician availability.

Vanity Installation

INSTALLATION

Before beginning installation, please ensure you have read the Prior to Installation section (pages 211-212).

1.PREPARATION

a) Remove doors and/or drawers from vanity

To remove drawers:

- Locate tab under each side of drawer, located on the underside of the drawer front.
- Pull them simultaneously towards you.
- Whilst still pulling the tabs, pull the drawer straight back towards you.
- The drawer is now free from the locking tabs, pull it out the rest of the way. NOTE: It is recommended that the drawer runners are covered to prevent particles/dust blocking the runners.

b) Remove benchtop from vanity and store in a safe place. Benchtops should NEVER be stored in direct sunlight or where they may be exposed to extreme weather.

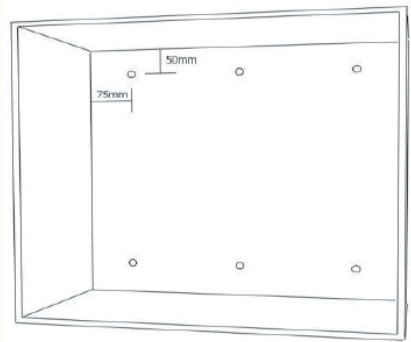

c) Mark the position of the top of the vanity (don't forget to include the top thickness/basin height), waste outlet, and hot/cold-water outlets. NOTE: support beams between studs are required to support wall hung vanity installation.

2.INSTALLATION

a) Having established the position where the vanity will be positioned, mark and drill the holes for your plumbing fixtures i.e. waste outlet, hot and cold-water outlets. Move vanity into position and ensure it is level and square. This may require packing behind and/or below the vanity.

b) Once it is level and square, fix the vanity to the wall using the correct fitting depending on your wall (not supplied). If using standard screws and star plugs, be sure to use the washers in order to spread the load.

c) Position fixings as shown:

The number of fittings used to fix cabinet will depend on the size of unit. Your installer will know the suitable amount depending on the size of your unit.

Rifco recommends the following minimum:

- Up to 900mm width vanity – 3 per row
- 900 to 1200mm width vanity – 4 per row
- 1500 to 1800mm width vanity – 6-8 per row

For wall hung vanities, it is essential the unit is fixed securely. The use of dyna bolts is recommended for masonry wall and fixing to studs in cavity walls. Rifco does not recommend installing wall hung vanities with toggle type fixing systems. Fixings should be placed evenly at a maximum of 300mm apart.

a) Connect the water supply lines and waste outlets.

b) Replace drawers or doors back onto the vanity unit and make any necessary adjustments.

c) Fix the top to the vanity unit using quality bathroom use silicone. Apply a continuous bead of silicone to all four edges of the vanity as well as the gap between the wall and benchtop top. The vanity unit must be sealed on all edges and the back where the top meets the wall to ensure water cannot penetrated the vanity internals. While our vanities are water resistant, they are NOT WATERPROOF. Water damage is NOT covered by warranty.

*Note to Minimal Vanity Installation in particular: Once the vanity top is installed, the cabinetry will be installed below it. However, a silicon bead needs to be run around the top of the vanity and all the underside of the vanity top. It should be clamped into place to ensure that both the vanity and the top become one.

3.FINISHING TOUCHES

- ✓ Ensure the drawer runners/hinges are clean and free to debris before installation as this could impact their operation.
- ✓ Install doors/drawers back onto vanity and make the necessary adjustments.
- NOTE: It is the responsibility of the installer to make any adjustments to doors and/or drawers.
- ✓ Ensure the drawer base stabiliser is screwed to the drawer front (see page 215)
- ✓ Dry any spillage or leakage of water on or inside the vanity that may have occurred during installation.
- ✓ Clean any residue, dust or building material from the vanity.
- ✓ Save this Installation & Care Instruction booklet for future reference

Vanity Installation

IDRAWER BASE STABILISATION

Once the vanity has been installed, levelled and the drawer front adjustments have been made, the drawer front must be secured to the drawer front. This is done by using the connector screw. This will ensure that the drawer base does not sag which can interfere with the drawer opening or closing or result in damage to the drawer base.

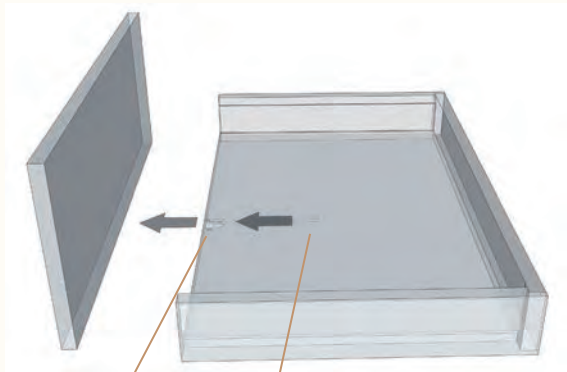

1. Locate the screw(s) and the black Stabilisation Connector (see below) that can be found on the underside of the drawer at the front (depending on the vanity size, there may be one or two screws).

Stabilisation Connector

2. Using a 5mm counter sunk screw (self-tapping), simply screw into the remaining empty slot in the black Stabilisation Connector. This will lock the drawer base to the drawer front.

Note: While the screw cannot be overtightened due to the protection from the cam, care should be taken not to strip the hole.

Stabilisation Connector

5mm Countersunk Screw

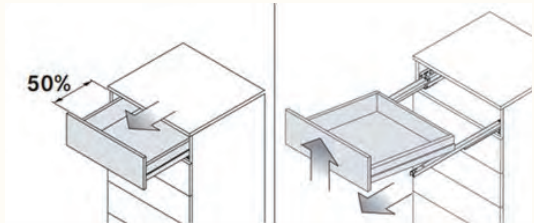

Screw to be inserted in to empty slot

NOTE: This step prevents the drawer base from sagging. Failure to complete this step may lead to difficulty opening the drawer and possible damage to the drawer base.

Drawer Removal, Adjustment & Installation

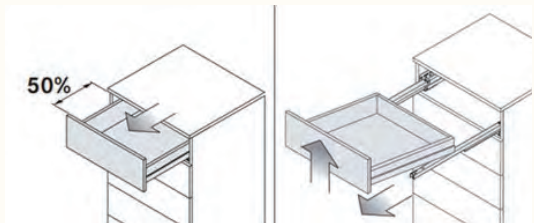

GRASS DRAWER RUNNER SYSTEM

1.REMOVING DRAWER

Open drawer approx. 50% of the way. Then pull up (softly). You will hear a "Click".

2.INSERTING DRAWER

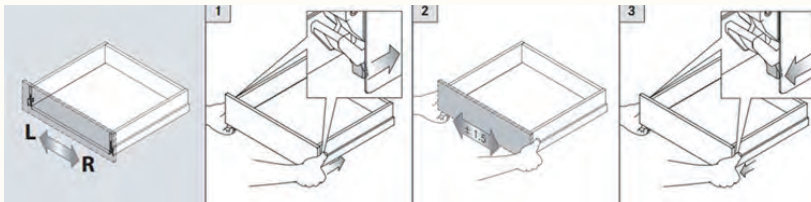

Pull the drawer runners all the way out and sit the drawer on top. Then push the drawer in (softly) until you hear a "Click". Ensure both sides have clicked into place.

REMEMBER

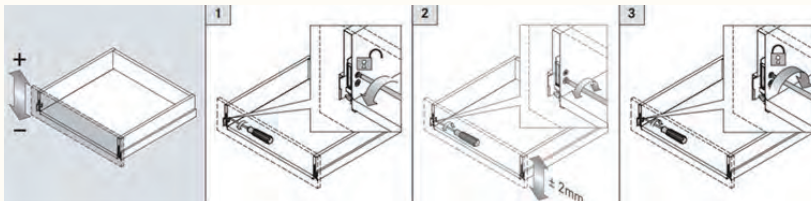

It is the responsibility of the installer to make any necessary adjustments to hinges & drawers.

3.DRAWER FRONT ADJUSTMENT - LEFT/RIGHT

With your fingers feel for the small metal latch under the drawer. Push it back halfway to adjust the left or right position. Fully pushing the latch will release the drawer front completely. Using slight pressure, move the drawer front in the desired direction. Repeat on both sides.

4.DRAWER FRONT ADJUSTMENT -UP/DOWN

Using a screwdriver, turn the top screw anti-clockwise to unlock. Then turn the bottom screw to make adjustment ($\pm 2\text{mm}$). Then turn the top screw clockwise to lock the position. Repeat on both sides.

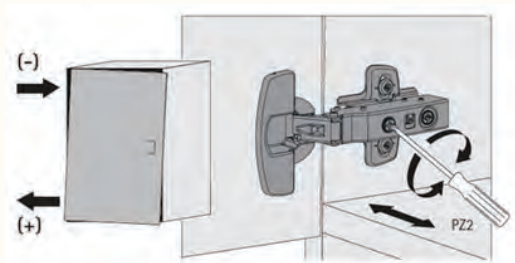

5.DRAWER FRONT ADJUSTMENT -TILT

Locate the screw at the back of the drawer. Using a screwdriver, turn the screw to adjust the tilt of the drawer front.

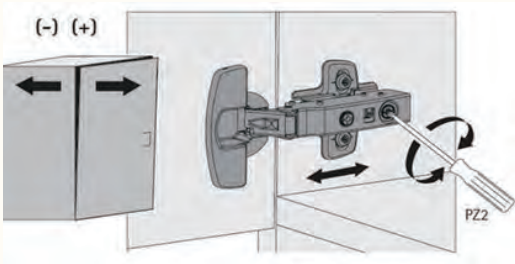

Hinge Adjustment & Installation

OVERLAY ADJUSTMENT

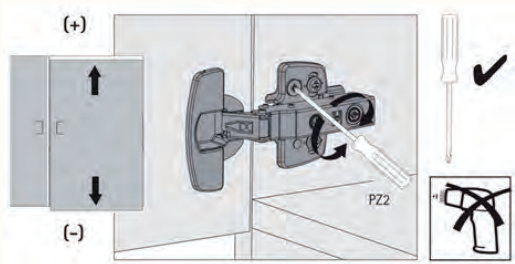

Reduce Door Overlay:
Turn screw clockwise
Increase Door Overlay:
Turn screw anti-clockwise

DEPTH ADJUSTMENT

Direct, infinitely variable depth adjustment.

HEIGHT ADJUSTMENT

Height adjustable mounting plates permit exact alignment of door. Direct, infinitely variable height adjustment by eccentric screw.

REMEMBER

It is the responsibility of the installer to make any necessary adjustments to hinges & drawers.

Care & Maintenance

These guidelines help keep your product looking its best and support long-term performance. Always test any cleaner in an inconspicuous area first.

1) POLYTEC

Routine cleaning

- Wipe with a soft cloth using warm, mild soapy water.
- For a streak-free finish, use a streak-free glass cleaner on a soft cloth.
- For stubborn marks, use methylated spirits sparingly on a soft cloth, then wipe clean and dry.
- Avoid abrasive pads, scouring powders, or harsh/solvent-based cleaners.

2) SOLID TIMBER

Routine cleaning

- Dust regularly with a soft, dry microfibre cloth.
- Clean spills promptly using a slightly damp cloth with mild soapy water, then dry immediately.

Protect the timber

- Keep water from pooling on surfaces and around joins.
- Use gentle, non-abrasive cleaners only; avoid harsh chemicals.
- Maintain stable conditions where possible (avoid prolonged direct sunlight and excessive humidity changes).

3) SOLID BRASS

General care (all brass finishes)

- Clean regularly with warm soapy water and a soft cloth.
- Dry thoroughly after cleaning.
- Avoid harsh abrasives, acids, alcohol, and vinegars.

RAW / unsealed brass (natural patina)

- Expect the finish to age and patina naturally over time; high-touch areas will change faster.
- Maintain by cleaning with a mild furniture polish, then apply a multi-purpose oil.
- To restore a brighter gold tone on unaged finishes, polish with Brasso as needed.

Electroplated brass finishes (wax/oil treated, 'unsealed')

- Wipe over the surface using a soft cloth with a multi-purpose oil.
- Clean with warm soapy water, dry thoroughly, then apply the multi-purpose oil.

Handling & installation tips

- Handle gently with a soft cloth; ideally install after other trades (painting, plasterboard, tiling).
- Avoid masking tape and solvents on the surface.
- Do not cut, drill, etch, or weld electroplated finishes (especially in wet areas).
- Do not leave brass items in plastic packaging for extended periods (may accelerate tarnishing due to 'sweating').

Product Warranty

At Rifco quality is of the utmost importance and we are committed to maintaining high standards across all our products. Should you find any fault with either the materials or workmanship within the warranty period listed below, Rifco will, at its discretion, repair or supply a replacement for the faulty product or component.

Product	Warranty Period (Domestic)	Warranty Product (Commercial)
Vanities	7 Years	1 Year
Shaving Cabinets(excluding mirror)	7 Years	1 Year
Mirrors	1 Year	1 Year
Basins	1 Year	1 Year
Lighting	1 Year	1 Year
Hardware	Lifetime	1 Year

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

SERVICE CALL OUT FEE

Should there be an issue with your Rifco product that is covered under the Rifco Warranty Policy, no call out fee will be charged.

If a Rifco representative is called out for things not covered under warranty such as door or drawer alignment or the installer has not followed the installation instructions correctly, a service call out fee of \$300 (incl. GST) will be applied.

Note: Response times will vary depending on technician availability.

Product Warranty

WARRANTY CONDITIONS

1. The fault or failure lies in the manufacture of the product.
2. The product(s) must be installed by a licensed installer.
3. The product(s) must be installed according to the above Installation Instructions.
4. You can provide proof of purchase.
5. The product(s) must be cared for in accordance with the Care & Maintenance Instructions.
6. Any claim for faulty or damaged goods must be made within 48 hours from receipt of product.

It is the installers responsibility to ensure that the product(s) are in good order and condition before installation. Installation of the product(s) constitutes acceptance of its colour, design,size, and style.

No claims for damaged or incorrect goods will be recognised or accepted once the product has been installed (this included partially installed goods).

WARRANTY EXCLUSIONS

1. Please note that no claims for damages / defects will be recognized after installation.Installation of the product is regarded as acceptance of that product and no claims for faulty or damaged goods can be made after installation.
2. Drawer or door adjustment after installation is not covered under warranty.
3. The liability of the warranty and guarantee is limited to a replacement cabinet or part thereof of similar value and does not include any service costs or related damage.
4. This guarantee does not cover damage by improper installation, accident, misuse, abuse,neglect, negligence, excessive wear and tear, improper care and maintenance, water, and natural causes such as sunlight, humidity, and other environmental conditions.
5. Water Damage. All our cabinets are manufactured from Australian Made HMR (highly moisture resistant) board but are not waterproof. Care must be taken to immediately dry any spillage or leakage of water that may gain access to the cabinet as water damage is not a justifiable claim. Installation, cleaning, and maintenance instructions need to be followed

Rough in Guide

INSTALLATION GUIDE - WALL-HUNG VANITY UNITS

Important: All installation work must be carried out by a licensed tradesperson in accordance with the Plumbing and Drainage Code of Practice and the requirements of all relevant statutory authorities.

Note: A certificate of installation completed by a qualified tradesperson must be provided for any warranty claims to be considered.

Rough in Guide

GENERAL INSTALLATION REQUIREMENTS

- » All vanity units, including both wall-hung and floor-standing designs, must be fixed securely to the wall to ensure proper support and safe use.
- » Pre-installation checks must be completed thoroughly. Please read and follow all installation instructions carefully.
- » During framing and rough-in stages, it is essential to ensure that the wall structure provides sufficient support for the vanity.
- » A minimum of two vertical timber or metal studs should be made available for secure mounting of the unit under the direction of your builder to ensure safety compliance.
- » Additional structural reinforcement may be required depending on the size and weight of the vanity unit purchased, to be advised by your builder.

*32mm free-flow waste recommended

WALL CONSTRUCTION AND BRACKET SUPPORT

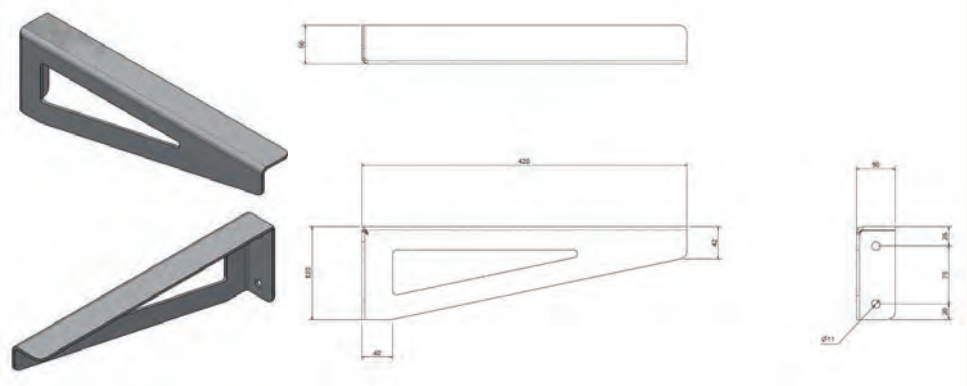

Due to the weight and construction methods used in our wall-hung vanities, the wall must be prepared with support brackets capable of bearing significant static and dynamic loads—similar to the requirements for installing stone-integrated vanities.

- » Heavy-duty metal wall brackets must be used. These must be rated for the total weight of the installed unit, including any additional weight from daily use (e.g., contents stored, countertop usage, basin weight, etc.).
- » The wall surface must be straight, plumb, and free from any bowing or twisting to allow for proper alignment and secure mounting.
- » Metal support pins must be fixed horizontally between the edge of the basin and the centre line.
- » Additional pins are recommended for larger vanities or double basin units to provide extra support and prevent sagging over time.
- » Silicone sealing between the back of the vanity unit and the wall is strongly recommended to reduce movement, provide moisture resistance, and ensure a cleaner finish.

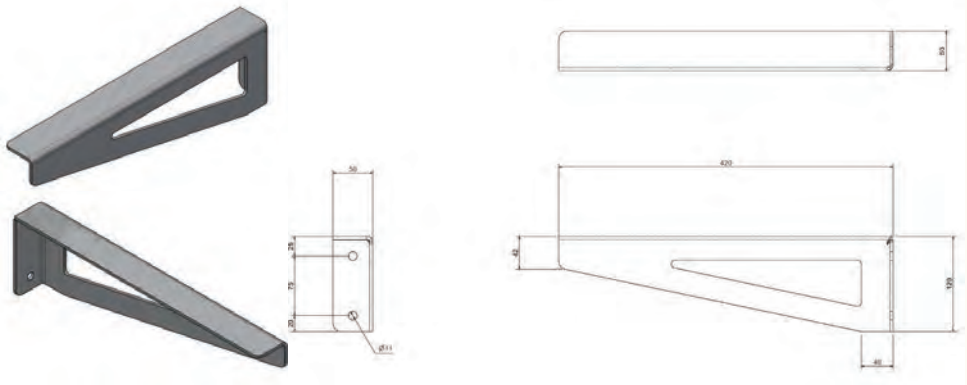

KAOLIN CERTIFIED WALL BRACKETS

- » Wall brackets can be purchased separately at an additional cost. They are sold in sets of two or three, depending on the size of the vanity purchased. Please refer to bracket certification.
- » Note: Each certified Kaolin bracket max weight load 180kg.

VANITY BRACKET SLIMLINE (LEFT)

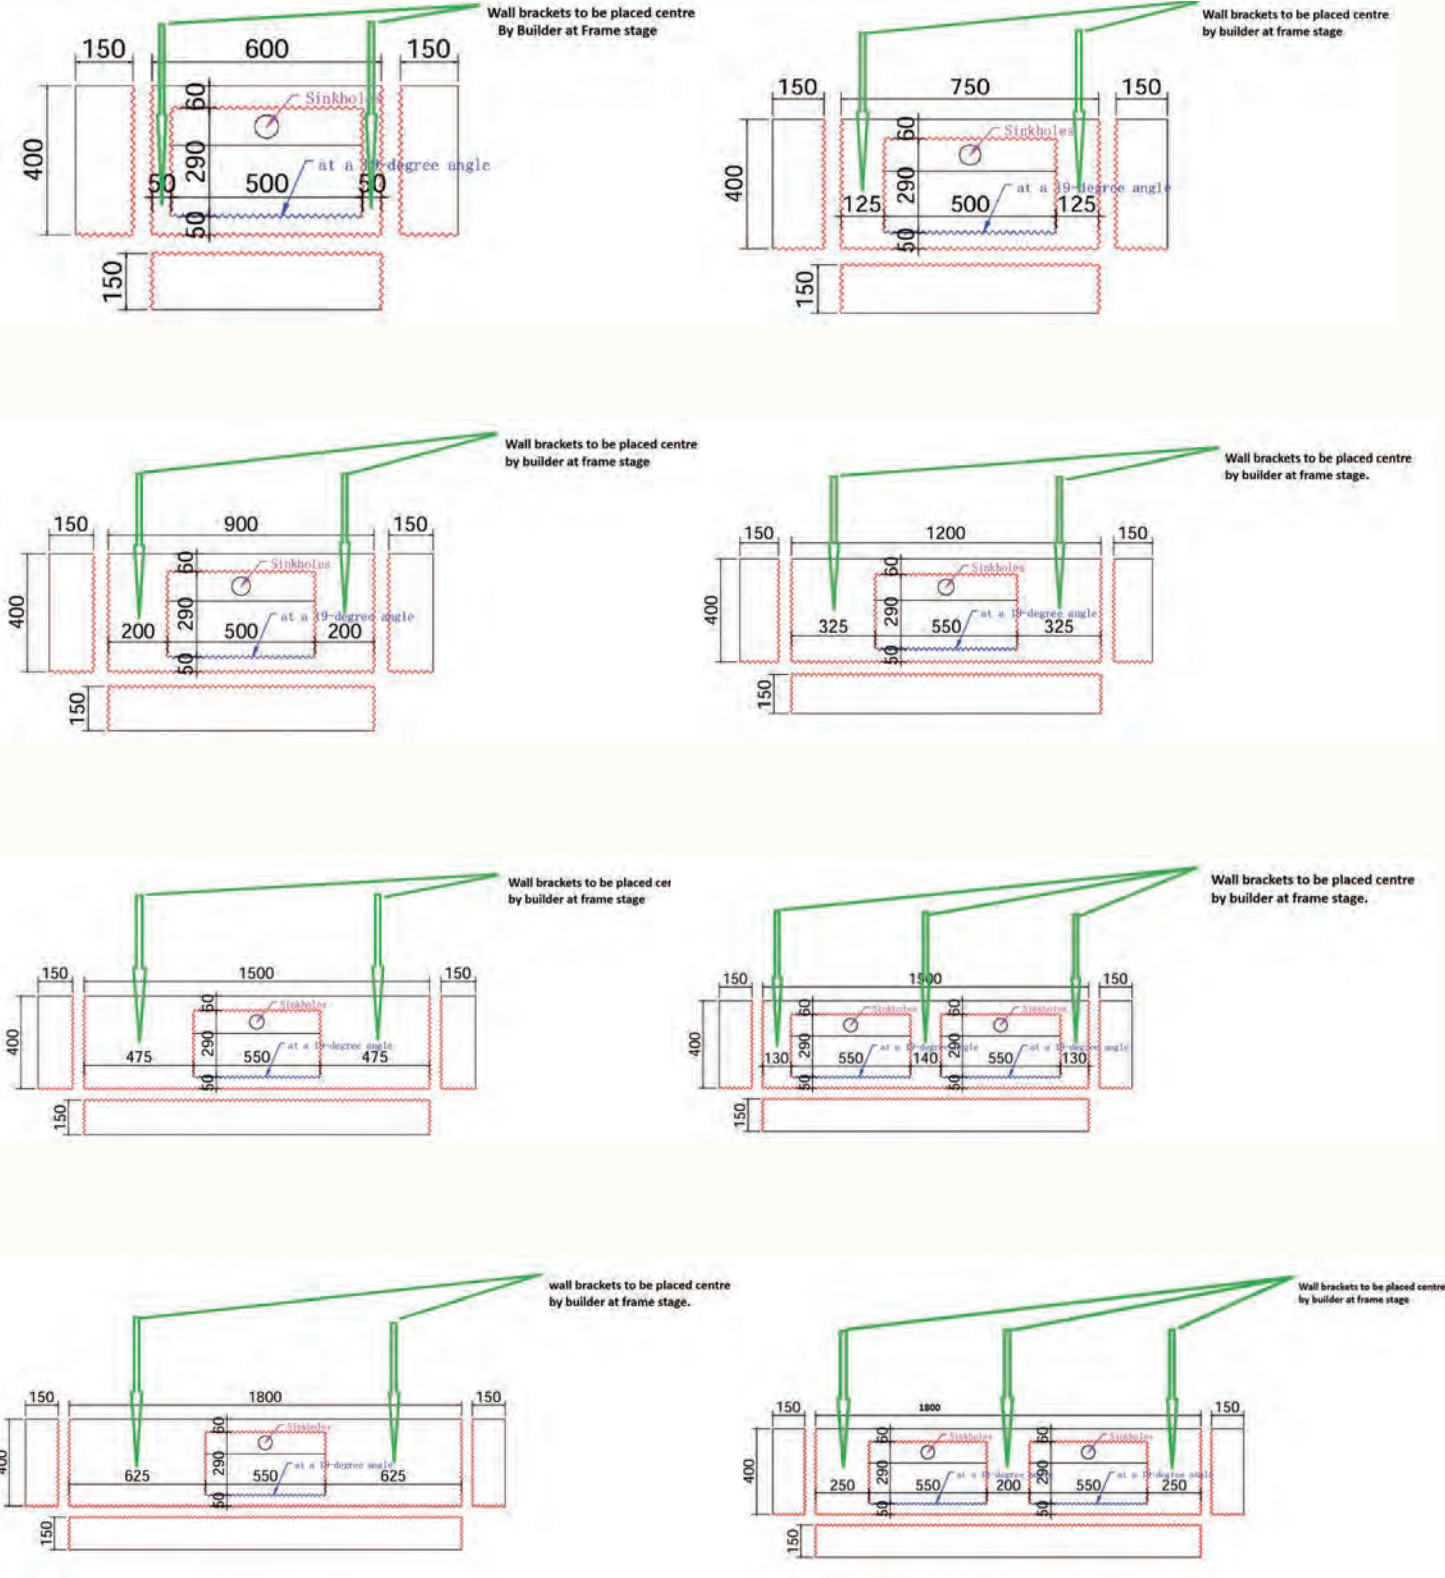

Vanity Weight Allowances

The following maximum weight allowances apply to vanities, excluding additional applied loads (e.g., basins, tapware, daily use, etc.). All installations must ensure appropriate structural support to accommodate both the vanity and any additional load.

NEW MODEL NO.	ITEM WEIGHT (KG)	BOXED TOTAL WEIGHT (KG)
W-600-SL	39	54
W-750-SL	43	64
W-900-SL	48	72
W-1200-SL	55	86
W-1500-SL-S	63	103
W-1500-SL-D	67	107
W-1800-SL-S	71	117
W-1800-SL-D	74	122
PED-500	86	122
PED-600	92	132
PED-700	98	141
PED-750	101	147
W-600-ST	40	60
W-750-ST	44	68
W-900-ST	49	77
W-1200-ST	57	92
W-1500-ST-S	66	108
W-1500-ST-D	68	110
W-1800-ST-S	74	124
W-1800-ST-D	76	126

Note: It is the responsibility of the installer to ensure fixings and wall structures are suitable to support the total combined weight.

Fit-Off Install

MANUFACTURING PROCESS – HANDCRAFTED DETAILS

Our porcelain products feature exposed mitred edges that are meticulously handcrafted. As part of this sustainable, artisanal process, minor surface variations and imperfections may occur. These are characteristic of handcrafted work and do not compromise the structural integrity of the product. Please note that such imperfections are considered a natural part of the manufacturing process and are not covered under warranty and are not considered faults.

IMPORTANT HANDLING INSTRUCTIONS – PRIOR TO TRADE HANDLING

Note that this unit is manufactured from high-quality porcelain and must always be handled with care:

- » Protective liners must be used during handling and installation to prevent chipping or damage.
- » If the unit needs to be placed on the ground prior to installation, adequate protective padding must be provided to ensure the edges remain intact and free from damage.
- » It is advised that the builder places the unit within its packaging as close as possible to the installation area. Failure to follow these instructions may result in damage, for which we cannot be held liable.

IMPORTANT NOTICE – PRODUCT INSPECTION & INSTALLATION GUIDELINES

To ensure the highest quality experience with your product, please carefully read the following guidelines:

- » Installation Requirement: This product must be installed by a qualified tradesperson.
- » Pre-Installation Check: Please thoroughly inspect the product upon delivery for any signs of damage, manufacturing faults, or specification discrepancies.

*Note: Claims for damage or incorrect items will not be accepted more than 48 hours after delivery.

Implied Acceptance: Proceeding with installation confirms your acceptance of the product’s colour, style, dimensions, and overall design.

Installer Responsibilities: It is the installer’s responsibility to ensure all care is taken on installation as per set terms below.

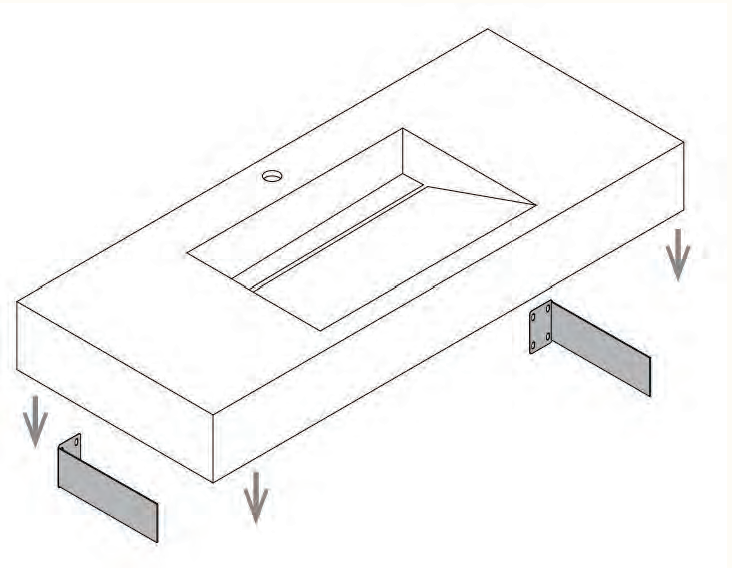

If the product appears damaged, defective, or does not meet expectations, halt installation immediately and contact your place of purchase or get in touch with our customer support team.

Please note: Warranty claims will not be accepted once the product has been installed. We are not liable for any costs associated with products rejected post-installation.

BRACKET POSITIONING

- fix the brackets to the wall using the holes provided. The installer is to provide screws to suit weight and substrate.
- check the correct flatness of the brackets at several points. In the event of unevenness and/or lack of squareness, correct this using spacers. Ensure brackets are level.

WASHBASIN POSITIONING

- apply an even layer of silicone to the top of the brackets
- position the washbasin in its final location by resting it on the brackets. The operation must be carried out during the period in which the silicone retains its full adhesive power

SERVICE CALL OUT POLICY

- » If your issue is covered under our Warranty Policy, there will be no charge for the service call.
- » If the issue is found to be outside of warranty—such as/mishandling and or incorrect installation - including misuse of chemicals - a call out fee of \$300 (incl. GST) will apply.
- » Response times may vary depending on technician availability.

FINAL NOTES

- » Improper installation or failure to follow these instructions will void the product warranty.
- » It is the installer’s responsibility to ensure compliance with all applicable local codes and regulations. For further technical support or clarification, please contact our customer service team before installation.

Cleaning & Care Guide

To maintain the appearance and longevity of your unit, please follow the recommendations below:

RECOMMENDED CLEANING PRODUCTS

- » Only pH-neutral cleaners are to be used.
- » Do not use chemical-based or abrasive cleaners, as they may damage the surface.

CLEANING INSTRUCTIONS

- » Clean the surface using warm water, a pH-neutral cleaner, and a microfibre cloth.
- » Wipe down regularly to remove dust, spills, and light marks.
- » Avoid excessive scrubbing or the use of rough sponges or brushes.

HEAT PROTECTION

- » When using heated styling tools or placing hot items on the surface, always use a heat mat to prevent potential damage or discolouration.

MAKEUP AND CHEMICAL PRODUCTS

- » It is recommended to use a makeup mat to protect the surface from cosmetics and personal care products.
- » Avoid direct contact with harsh chemicals or products containing strong dyes, alcohols, or solvents.

Handcrafted Mitred Edge

Warranty

Warranty Statement: Porcelain Integrated Vanity

WARRANTY COVERAGE

This warranty guarantees the structural integrity of your porcelain integrated vanity for a period of five (5) years from the date of original purchase. The surface is warranted to be heat- and stain-resistant under normal residential usage conditions.

CONDITIONS OF WARRANTY

1. Approved Cleaning Products

Only pH-neutral cleaning products are permitted for use on the vanity surface. Use of non-pH-neutral products, abrasives, or acidic/alkaline cleaners may cause damage and will void the surface warranty.

2. Installation Requirements

- » The vanity must be wall-mounted using structural brackets that comply with Australian building standards.
- » Installation must be carried out by a licensed builder and/or plumber.
- » Failure to comply with installation requirements will void all warranty coverage.

3. Handcrafted Details

- » Exposed mitred edges are handcrafted and may exhibit minor surface irregularities. These are considered a normal characteristic of the sustainable production process.
- » Such minor imperfections are not covered under warranty, as they do not affect the product's performance or structural integrity.

EXCLUSIONS

This warranty does not cover the following:

- Damage caused by improper cleaning, including use of non-approved cleaning agents.
- Structural issues or failures resulting from non-compliant or incorrect installation.
- Cosmetic imperfections associated with handcrafted mitred edges.
- Accidental damage, misuse, negligence, or any post-installation alterations not performed by a licensed professional.

WARRANTY CLAIM PROCESS

This warranty does not cover the following:

To lodge a warranty claim, please contact our Customer Service Team and provide the following:

- Proof of purchase
- A detailed written description of the issue
- Clear photographs of the affected area
- Licensed trade receipt of install

A certified representative may need to inspect the product to verify the claim.

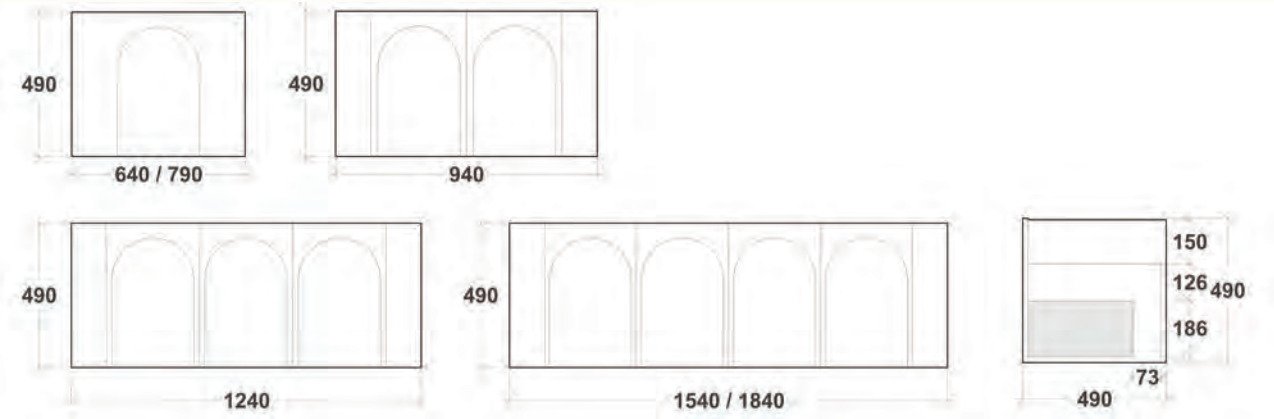

LIMITATIONS

This warranty is non-transferable and applies only to the original purchaser. It is valid only when the product is used under normal residential conditions and maintained according to the care guidelines provided.
